

SWASTHI COMPUTERS

SERVICE CATALOGUE

Data Engineering & Big Data

Building scalable, AI-ready data foundations — from pipeline engineering and real-time analytics through to modern data warehousing and governance. We treat data architecture as the critical enabler for every AI and analytics initiative.

PROVEN

Data Pipeline Engineering

We build reliable data pipelines using Azure Data Factory and Microsoft Fabric, moving data from source to insight.

Power BI & Enterprise BI Architecture

Semantic models, dashboards, and governed self-service BI that puts trusted data in the hands of decision-makers.

NOW

Real-Time Analytics with Azure Stream Analytics

Process streaming data from IoT devices, logs, and applications with low-latency analytics.

Data Lake & Warehouse Modernisation

Modernise legacy data platforms with Fabric Lakehouse and Synapse, reducing cost and unlocking new analytical capabilities.

Data Governance & Cataloguing

We implement Microsoft Purview for data discovery, lineage, classification, and policy enforcement.

IoT Data Ingestion Pipelines

Architected for WindTrack and adaptable to any industrial IoT use case — turbines, factory lines, grid sensors.

ASPIRE

End-to-End Modern Data Platform

Full data platform transformations combining ingestion, storage, governance, analytics, and AI readiness — a multi-phased engagement.
