

Enterprise AI Adoption

Helping organisations adopt AI safely and effectively — from strategy and readiness assessment through to production-grade custom model development and Copilot agent deployment. We focus on responsible AI governance as a starting condition, not an afterthought.

PROVEN

AI Strategy & Readiness Assessment

We assess your organisation's AI readiness and build a practical, prioritised adoption roadmap.

Prototype Development

We build working prototypes to validate AI use cases before committing to full-scale investment.

NOW

Custom Model Development — Azure AI Foundry (RAG)

We build retrieval-augmented generation solutions on Azure AI Foundry, grounding AI outputs in your own data.

AI Governance & Responsible AI Frameworks

We put governance frameworks in place from day one, so responsible AI is a starting condition, not a retrofit.

Model Fine-Tuning

We fine-tune models to your domain, your data, and your specific use case.

Azure OpenAI Integration

We integrate Azure OpenAI into your existing systems and day-to-day workflows.

ASPIRE

Production-Scale Copilot Studio Agent Deployment

We're building toward full production-scale deployment of Copilot Studio agents across the enterprise — talk to us about your rollout roadmap.

Enterprise-Wide AI Adoption Rollouts

Talk to us about scaling AI adoption across your full organisation.

Ready to start your AI adoption journey?
